1 **GPSD Account Number**

2 **District Treatment Charge**

This is the District's portion of the billing for actually treating the wastewater from those properties where the lateral is owned by the City of Peoria.

Or

Sewer and Treatment Charge

This is the District's portion of the billing for both the lateral and disposal charges for District-owned sewers.

3 **Capital Surcharge**

This is for capital improvements which may include debt service needs, as well as projects within the treatment plant and the entire collection system.

4 **City of Peoria Sewer Charge**

This property is connected to a City of Peoria lateral pipe. This represents the City of Peoria's cost to maintain sanitary sewers for those customers connected to a City of Peoria owned sewer. The Peoria City Council sets this rate. If the customer has this charge, they do not have a lateral charge from GPSD. Their sewer and treatment charge would only be for disposal. This charge covers day-to-day operational costs, such as cleaning.

5 **City of Peoria Sewer Rehab**

Everybody within the city limits gets this charge per City of Peoria Ordinance. This is the cost to improve sewers owned by the City of Peoria. The Peoria City Council sets this rate. This charge is for long term capital related needs, such as replacing pipes, while keeping the infrastructure sound and intact.

6 **Rate Calculation**

How is my billing calculated? The sewer bill is based on water consumption. We get the readings directly from the water company. We pay three different water companies for their readings. If disputing the readings, you need to contact your water company.
